November 2022

Marine Chemist Association Newsletter

The Marine Chemist Association held a Board of Directors (BOD) meeting on October 23 in Chicago at the Hilton Chicago O'Hare Airport Hotel. This was preceded by the first in-person sectional seminar in three years. Information on the seminar, board meeting and general Marine Chemist activities follow.

At our first in-person sectional seminar in three years there were 3 Chemists, two board members and two trainers in attendance along with NFPA representative Larry Russell.

Typically, attendance at sectional seminars averages 20 chemists. The Board attributed the low turnout to the large number of chemists who attended the virtual meetings in the past and who do not require an in-person seminar to fulfil their educational requirements. This trend is expected to continue for a few more years until the five-year recertification cycle associated with the virtual seminars ends. At the sectional seminar members in attendance commented on the importance of face-to-face interactions that occur vs the virtual seminars. The seminar had numerous questions and interactions that virtual seminars do not generate.

One strong indication of the importance of in-person interactions was a presentation on Occurrences given by Larry Russell. Larry gave the presentation online with 34 individuals at the spring 2022 seminar. The presentation generated minimal comments and questions. The exact same presentation was given at the annual seminar due to a last-minute cancelation by a presenter. The presentation generated so many comments and questions that it ran over its allotted time slot and had to be cut short.

Hilton Los Angeles Hotel Site of the 2023 Spring Sectional Seminar

Spring 2023 Sectional Seminar

In an effort to continuously improve the sectional seminars the BOD reviewed the presentations at the Chicago sectional seminar. In general, the presentations were well accepted and generated a significant amount of discussion on the theme of Safe for Limited Hot Work. Some minor changes were made to improve the presentations for the spring seminar.

A similar presentation will be given at the spring 2023 seminar in Los Angeles. The seminar will occur on Saturday March 25th 2023 at the Hilton Los Angeles Airport Hotel. (5711 West Century Blvd. Los Angeles, CA 90043). You can register for the seminar and book a room on our website, www.marinechemistassociation.com . If you attended the fall 2022 seminar in Chicago you will not be able to obtain additional educational credit for this seminar as the topics will be the same.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378

■ dvraff@comcast.net

A Board of Directors (BOD) meeting will be held on March 26th following the seminar.

The topics for the spring sectional seminar will be.

1. Roll Call
2. Business overview/Occurrences if needed. L. Russell
3. Safe for Limited Hot Work.
 - a. History of the SSD and SFLHW designations. Larry Russell
 - b. Cleaning for SFLHW. Brian Axelrad
 - c. Inspection Practices for SFLHW. Geoff Jenny
 - d. What should be on a SFLHW Certificate? Don Raffo
 - e. Certificate writing exercise SFLHW Don Raffo
 - f. Technological tools for the Marine Chemist to Aid in Inspections. Austin Montanti.
 - g. Open Discussion for Chemists. Moderator Don Raffo

The seminar will be held in the Marina Room and the BOD meeting will be in the Catalina C Room, both are on the second floor. Breakfast will be from 0700-0800 each day and the seminar begins at 0800. The Chicago seminar ended about 1530 for planning purposes. Cutoff date for the room block and seminar is March 3, 2023. No refunds are available after this. The seminar fee will increase after this date due to associated costs for the hotel due to late bookings.

■ dvraff@comcast.net

Our 2023 Annual Seminar will be held at the Francis Marion Hotel in Charleston, SC. from July 10-12 with the BOD meeting being held on the 11th. Similar to last year we will have a local chemist group helping with the site work. Josh Marshall 721 along with his group of chemists at MET-Chem will be our local hosts. Initial meetings have already been initiated and Josh and his group are excited about the seminar being held in Charleston.

Hank's Seafood Restaurant, a popular Charleston restaurant

Charleston has many great and popular restaurants and is known as a food/restaurant destination. If you are considering going to one of the popular restaurants in the city it is highly recommended that you make a reservation early. Many of the popular restaurants can be booked over a month ahead of time. Please plan accordingly. The Francis Marion Hotel has

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378
■ dvraff@comcast.net

provided a list of a few of the local restaurants which can be found at the end of the newsletter. This is just a small list as there are too many to list.

The Francis Marion Hotel, Charleston, SC.

Last year, to encourage chemists to attend the seminar an incentive program was initiated. With the large number of chemists attending the virtual seminars it is difficult to judge the number of members who will attend an in-person seminar, however the turnout at San Antonio returned to average and the Board believes this was due to the incentive program. Discussions with the Marine Gas Hazard Control Program/Fund indicated that the incentive will be available in Charleston to encourage attendance. The requirements for the incentive follow.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378
■ dvraff@comcast.net

Seminar Incentive Program Requirements

- The seminar fee (\$400) will be reimbursed/refunded by the MCA. However, you must initially register and pay the seminar fee.
- Up to \$600 towards room fees will be reimbursed/refunded by the MGHCP through the MCA.
 - **Stipulations are as follows.**
 - You must be a certified Marine Chemist and attend the entire seminar and obtain credit for attending. Note: The 90% attendance waiver will not apply to be eligible for the incentive payment. You must attend the entire seminar to obtain the incentive payment.
 - You must stay at the seminar hotel under the MCA room block and your room expenses must be at least \$600. (You can be reimbursed a lesser amount of up to \$200.00/day for the room only).
 - You will be required to pay the fees up front and then fill out an expense voucher with seminar and hotel receipts to be refunded. At the conclusion of the seminar and when credit for attending is obtained, your receipt for the seminar fee and the hotel will be submitted for up to \$1000.00 in reimbursement. Please email copies of the documents to dvraff@comcast.net and a check will be sent out.
 - If you sign up late and are not able to get into the MCA room block you must stay at the same hotel (Francis Marion Hotel) to obtain a refund. Stays at other properties will not be reimbursed for the hotel portion.
 - You must make your own arrangements.

You can currently reserve your room at the Francis Marion. There is a link on our website to make reservations. <https://marinechemistassociation.com/events/annual-seminar-2023/>

You can also make reservations as follows:

Each guest can make their own reservations by calling (843) 722-0600 or 1(877) 756-2121 by Thursday, June 8, 2023. You must identify yourself as a member of the Marine Chemist Association. All reservations must be guaranteed and accompanied by a first night room deposit or guaranteed with a major credit card.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378

■ dvraff@comcast.net

The cutoff date for room reservations is Thursday June 8, 2023. After this you will not get the MCA room block rate. If you are considering coming, please make a reservation as we frequently sell out our room block. The MCA has reserved 163 room nights which is our typical number. Please remember that other groups associated with the MCA will also be using the room block so early reservations are suggested. If you cannot get into the room block and are making reservations prior to June 8 please call or email Don Raffo as I can frequently get you into the room block by calling our contact at the hotel. Cutoff date is for both the seminar and the room block is June 8th. No refunds can be provided after this date for the seminar. Also, after this date there will be a late registration fee increase, as you will still be able to attend but at an increased cost.

The following shows the current schedule of seminars.

Current	2020	2021	2022	2023	2024
March	Atlantic (Canceled)	Pacific (Virtual)	Virtual	LA. CA	TBD
Annual	Pacific (Canceled)	Gulf/Inland (Virtual)	In Person San Antonio	Charleston, SC.	TBD
October	Gulf/Inland (Canceled)	Atlantic (Virtual)	In Person Chicago	TBD	TBD

NFPA 306

The second draft meeting was held on October 19, 2022 and 38 public comments were reviewed. Several second revisions were made by the Committee. Voting on the second revisions will be completed by the end of the year and the new document should be ready by June 2023.

The BOD supported a reformatting of 306 in accordance with Public Input on submissions 34, 41 and 45. The reformatting did not make it into this round of 306 but the BOD set up a committee to submit the reformatting to the 306 committee. This will be commenced once the latest revision of NFPA 306 is complete.

At the annual seminar a presentation on the changes to NFPA 306 will be presented. The BOD has invited the MCQB to attend and listen to the presentation. They will not respond to any questions if they attend.

NFPA Report

The NFPA Secretary, Eliana Paniagua is currently on maternity leave until January and Larry has taken over her duties until she returns. All recertifications for the year are mostly complete. Five applications for new trainees are in process. There are 95 current certified chemists.

The certification of James Bishop, CMC 639, expired on September 1, 2022. Les Blaize, CMC 586, certificate expired on November 1, 2022. Neither member sought recertification.

Marine chemist Max Chou, CMC 733, has relocated to Hawaii.

MCQB Welcomes the Newest Marine Chemist

The Marine Chemist Qualification Board is pleased to announce that Ross Paul Mayet has met the qualifications established by the National Fire Protection Association to discharge the duties of a Marine Chemist. Ross has been awarded NFPA Certificated Marine Chemist, Qualification Certificate Number, 743. Ross will be working with Marine Chemist Jack Rebstock, CMC 702, in Larose, LA.

Left to Right: MCQB Member, Joshua Marshall, CMC 721; Mr. Ross Mayet, CMC 743;

MCQB Chairman, Terry Guidry.

Website

The MCA website (www.marinechemistassociation.com) has undergone a complete overhaul. To access the website, you must log in again with your password. Once that is done you will be automatically logged in after that. If you have problems logging in, please contact the webmaster at support@marinechemistassociation.com.

One of the more user-friendly changes is the ability for more control over your account, information, and membership. You now can change your personal information on the website and no longer need to contact me or the web person. It can be accomplished by going to the My Dashboard section (located in the upper right of the home page) and making the changes. It will then appear on the site.

The forum is now the primary way for communication with members. Information for chemists is posted on the website. Failure to sign up for the Forum indicates consent to not receive meeting notifications.

There is also a forum section which only chemists may view. It is an area where news and technical discussions may be posted. If you are registered, you will get a text message and/or email whenever there is new information. Information on seminars, newsletters,

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.
