April 2023

Marine Chemist Association Newsletter

The Marine Chemist Association held a Board of Directors (BOD) meeting on March 26th in Los Angeles at the Hilton Airport Hotel. This was preceded by the second in-person sectional seminar following the pandemic. Information on the seminar, board meeting and general Marine Chemist activities follow.

At our sectional seminar there were 6 Chemists and 8 board members in attendance along with NFPA representative Larry Russell.

Typically, attendance at sectional seminars averages 20 chemists. While the attendance numbers are increasing the Board believes that the low turnout is due to the large number of chemists who attended the virtual meetings in the past and who do not require an in-person seminar to fulfill their educational requirements. This trend is expected to continue for a few more years until the five-year recertification cycle associated with the virtual seminars ends. At the sectional seminar members in attendance commented on the importance of face-to-face interactions that occur vs the virtual seminars. The seminar had numerous questions and interactions that virtual seminars did not generate.

Spring 2023 Sectional Seminar

In an effort to continuously improve the sectional seminars the BOD reviewed the presentations at the Chicago sectional seminar. In general, the presentations were well accepted and generated a significant amount of discussion on the theme of Safe for Limited Hot Work. Some minor changes were made to improve the presentations for the spring seminar.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

■ dvraff@comcast.net

Hilton Los Angeles Hotel Site of the 2023 Spring Sectional Seminar

A similar presentation will be given at the fall 2023 seminar in the Atlantic section. While a location has not been determined yet the BOD is looking in the Washington, DC or Baltimore area. Once a location is finalized you can register for the seminar and book a room on our website, www.marinechemistassociation.com . If you attended the spring 2023 seminar in Los Angeles you will not be able to obtain additional educational credit for this seminar as the topics will be the same. The BOD decided to maintain the same topics at the fall seminar (Safe for Limited Hot Work) to get the seminars back in sync.

A Board of Directors (BOD) meeting will be held the day after the seminar.

The topics for the fall sectional seminar will be.

1. Roll Call
2. Business overview/Occurrences if needed. L. Russell
3. Safe for Limited Hot Work.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

The Francis Marion Hotel Lobby. Site of the 2023 Annual Seminar in Charleston, SC.

Annual 2023 MCA Seminar

Our 2023 Annual Seminar will be held at the Francis Marion Hotel in Charleston, SC. from July 10-12 with the BOD meeting being held on the 11th. Similar to last year we will have a local chemist group helping with the site work. Josh Marshall 721, along with his group of chemists at MET-Chem, will be our local hosts. Initial meetings have already been initiated and Josh and his group are excited about the seminar being held in Charleston.

Charleston has many great and popular restaurants and is known as a food/restaurant destination. If you are considering going to one of the popular restaurants in the city it is highly recommended that you make a reservation early. Many of the popular restaurants can be booked over a month ahead of time. Please plan accordingly. The Francis Marion Hotel has provided a list of a few of the local restaurants which can be found at the end of the newsletter. This is just a small list as there are too many to list.

Seminar and Meeting Dress Code and Information

The BOD reminds you that we are a professional organization and all members are expected to dress properly during meetings. Business casual dress is required at all seminars and BOD meetings. Additionally, when coming before any Board you are reminded to dress professionally and use appropriate language. This is especially true when going before the MCQB.

The insurance fund reminds every chemist that if appearing before the MCQB for any type of a review you are permitted and encouraged to bring counsel, documentation or any information to make your case. The MCQB also encourages this practice.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

76 Farmholme Road ■ Stonington, CT. 06378

■ dvraff@comcast.net

The Francis Marion Hotel, Charleston, SC.

Last year, to encourage chemists to attend the in-person seminar an incentive program was initiated. With the large number of chemists attending the virtual seminars it is difficult to judge the number of members who will attend an in-person seminar. However, the turnout at San Antonio returned to average and the Board believes this was due to the incentive program. Discussions with the Marine Gas Hazard Control Program/Fund confirmed that the incentive will be available again in Charleston. The requirements for the incentive follow.

Seminar Incentive Program Requirements

- The seminar fee (\$400) will be reimbursed/refunded by the MCA. However, you must initially register and pay the seminar fee.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378

■ dvraff@comcast.net

- Up to \$600 towards room fees will be reimbursed/refunded by the MGHCP through the MCA.
 - **Stipulations are as follows.**
 - You must be a regular member, certified Marine Chemist and attend the entire seminar (100%) and obtain credit for attending. Note: The 90% attendance waiver will not apply to be eligible for the incentive payment. You must attend the entire seminar to qualify
 - You must stay at the seminar hotel under the MCA room block and your room charge expenses must be at least \$600 (Does not include incidentals and you can be reimbursed a lesser amount for the room cost only).
 - You will be required to pay the fees up front and then fill out an expense voucher with seminar and hotel receipts to be refunded. At the conclusion of the seminar and when credit for attending is obtained, your receipt for the seminar fee and the hotel can be submitted for up to \$1000.00 in reimbursement. Please email copies of the documents to dvraff@comcast.net and a check will be sent out.
 - If you sign up late and are not able to get into the MCA room block you must stay at the same hotel (Francis Marion Hotel) to obtain a refund. Stays at other properties will not be reimbursed for the hotel portion.
 - You must make your own arrangements.

You can currently reserve your room at the Francis Marion. There is a link on our website to make reservations. <https://marinechemistassociation.com/events/annual-seminar-2023/>

You can also make reservations as follows:

Each guest can make their own reservations by calling (843) 722-0600 or 1(877) 756-2121 by Thursday, June 8, 2023. You must identify yourself as a member of the Marine Chemist Association. All reservations must be guaranteed and accompanied by a first night room deposit or guaranteed with a major credit card.

The cutoff date for room reservations is Thursday June 8, 2023. After this date the MCA room block rate will not be available. If you are considering coming, please make a reservation as we frequently sell out our room block. The MCA has reserved 163 room nights which is our typical number. Please remember that other groups associated with the MCA will also be using the

Draft Annual Agenda

Presenters are being finalized at this time but a draft schedule follows; please remember that this is subject to change.

Sunday, July 9th 5:00pm to 7:00pm. Mark Clark Presidential Suite Registration.

Monday, July 10th.

8:00am - 10:00am, Gold Ballroom. Welcome Breakfast

10:00 to about 3:00 Spouse and Friends Tour. Includes transportation to a carriage tour (a short walk away) followed by lunch at High Cotton restaurant next to Charleston's City Market. Return at your leisure.

10:00 – 1200 MCA Annual Business Meeting. Gold Ballroom, members only.

1200 – 2:00 Insurance luncheon, Gold Ballroom. Open to all regular chemists

2:00 to about 3:30. Joe Cox and the MGHCP and Bernard Diaz from the MCQB.

Monday evening, free night to explore the city.

Tuesday, July 11th

7:00am – 8:00am Gold Ballroom, Breakfast for seminar attendees.

8:00am – 9:00am Coffee and muffins in the Mark Clarke Suite for spouses and friends.

8:00am – 3:00 pm. Annual seminar presentations. Order to be determined.

Inerting and its Effect on Instrument Sensors, Bob Henderson, GFG Instruments

Fall Protection in the Maritime Environment, Shawn Smith. USN

Atmosphere Analysis following a Shipboard Fire, Robert Tew, CMC 712

Charleston Fire Department and the Marine Chemist, TBD

OSHA Subpart P Requirements and Considerations in Setting up Containment.

Geoffery Jenny CMC 685

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

The following shows the current schedule of seminar locations. Changes are due to the pandemic scheduling.

Current	2020	2021	2022	2023	2024
March	Atlantic (Canceled)	Pacific (Virtual)	Virtual	Los Angeles, CA.	TBD
Annual	Pacific (Canceled)	Gulf/Inland (Virtual)	San Antonio TX.	Charleston SC.	TBD
October	Gulf/Inland (Canceled)	Atlantic (Virtual)	Chicago, IL.	TBD	TBD

BOD and Correspondence

Just as a reminder any emails, letters or other correspondence to the BOD becomes the official business of the MCA and will be listed in the correspondence section of the minutes.

NFPA 306

Larry Russell reported that as of 3/24/23 no NITMAM's were submitted with a closing date of 3/28/23. It is anticipated that no NITMAMs will be submitted and the standard will go forward as amended. If there are no challenges it is hoped that the printed standard will be sent to all regular members before the annual seminar.

The BOD set up a committee to submit a reformatting of the standard to the 306 committee. This will start once the latest revision of NFPA 306 is complete. Don Raffo will chair the committee.

At the annual seminar a presentation on the changes to NFPA 306 will be held. It is anticipated that this will take place on Wednesday morning. The BOD has invited the MCQB to attend and listen to the presentation. They will not respond to any questions if they attend. Most of Wednesday morning will cover this topic.

NFPA Report

There are currently 94 active chemists.

Devoted to the development and dissemination of methods for evaluating and eliminating health, explosion, and fire hazards in marine industries.

Marine Chemist Association, Inc.

76 Farmholme Road ■ Stonington, CT. 06378
■ dvraff@comcast.net

John Walker CMC 628 has notified NFPA that he retired.

Eliana Paniagua, who was Larry's secretary, has left for another position within NFPA and Larry is seeking a replacement. Currently Larry will assume her duties. Anyone sending in letters through the mail will need to notify Larry so he can come to the office and pick them up as he is working remotely.

View from the Dewberry Hotel Rooftop Bar (Citrus Club) across from the Francis Marion Hotel

Marine Chemist Physical Ability to Perform Duties

NFPA sends the following reminder to Chemists who may not be able to perform their work due to a temporary physical limitation.

The NFPA Marine Field Service wishes to remind all Marine Chemists, the *Rules for the Certification and Recertification of Marine Chemists*, as amended 01 September 2023, *Section II. Qualifications – General, Paragraph A*, requires all Marine Chemists to “*be of an maintain*

■ dvraff@comcast.net

good character, and physically able to perform the duties of a Marine Chemist". In the event that a Marine Chemist is unable to physically perform his or her duties due to injury or illness; the Marine Chemist should be examined by a licensed physician or licensed physician's and obtain a statement attesting to the Chemist's physical ability to perform the duties of a Marine Chemist. The *General Medical Examination Form* (Form No. CMC-MD-01) can be used for this purpose.

Some historical information from NFPA.

Presently there are only three CMCs with Qualification Document Numbers in the 500s they are:

John T. Bell, CMC 585

Marley Carter, CMC 564

Ken Mercer, CMC 577

Congratulations to these senior experienced chemists.

MCQB Welcomes the Newest Marine Chemist

The Marine Chemist Qualification Board is pleased to announce that at its meeting in Tampa **Charles Mac Corbin** has met the qualifications established by the National Fire Protection Association to discharge the duties of a Marine Chemist. Charles has been awarded NFPA Certificated Marine Chemist, Qualification Certificate Number, 744. Charles will be working with Marine Chemist Jason Babin, CMC 684.

Your current BOD is as follows;

- a. Executive Committee (BOD)
 - ii. Philip Giles, Chairman, Term expires 7/24
 - iii. Michael Schmidt, Past Chairman, Term expires 7/24

 - xiii. Atlantic alternate Robert Albert, term starts 7/23 after annual
 - xiv. Gulf/Inland alternate Gary Snell, term starts 7/23 after annual

MGHCP Report

The MCA requested a grant of \$248,000 at the January meeting of the board and it was approved. This funding goes to subsidize the seminars, run the MCA and support BOD meetings. The cost per person of a sectional seminar is about \$850 and an annual seminar is about \$1200. This is dependent on the number of chemists attending the seminars. The current cost of a sectional seminar is \$78.00 and an annual is \$416.00. The balance is paid from the grant.

During 2022, 19,191 electronic certificates and 10,850 paper certificates were issued for a total of 30,041 certificates. This number is significant as the general thought is that 30,000 certificates are needed to financially support the program at the current surcharge rate of \$25.00. While there is no surcharge increase planned in the near future it is important to be aware of this number. NFPA reported a slightly larger number of certificates issued (30,600). This is most likely due to paper certificates purchased in 2021 but issued in 2022 or purchased at the end of 2022 which will be issued in 2023. While the NFPA number is important the total used to compute income is significant as that is where the MCA obtains its funding.

At the start of 2023 the numbers seem to be improving as shown below. Hopefully, the upward trend continues.

2023 Q1 Certificates issued

	2023	2022	2021
EMCC	5,254	4,747	4,418
Paper	2,925	2,625	3,700
Total	8,179	7,372	8,118

Ethics

Past chair Michael Schmidt (Ethics Committee Chair) reported that there are no ethics issues before the board.

Website

The MCA website (www.marinechemistassociation.com) has undergone a complete overhaul. However, after the overhaul the site experienced issues related to a plug-in application not working. This caused problems with membership renewals. I would like to personally apologize for the issues associated with this. While the plug-in was checked out prior to use, after it was installed, the company was bought out and support for the plug-in stopped. The MCA has switched to a more reliable plug-in for the site. If you have any issues contact Don Raffo or the support email below. To access the website, you must log in with your password. Once that is done you will be automatically logged in after that. If you have problems logging in, please contact the webmaster at:support@marinechemistassociation.com.

One of the changes is the ability for more control over your account, information, and membership. You now can change your personal information on the website and no longer need to contact me or the web person. It can be accomplished by going to the My
